

## 2017 FALL MAINTENANCE REQUEST FORM

Name:	Phone:
E-mail Address:	
Street Address:	
City and Postal Code:	

Please fill out all necessary information and submit with pre-payment by **October 6/2017** and receive a **20% Discount** on your fall services

Shutting your pond down for the season requires minimal maintenance or attention for your water feature all winter. We recommend shutting down the pond after the majority of leaves have fallen. And remember, you cannot restart your pond until the underground pipes have thawed and you have cleaned your bio-falls.

### Option 1: Partial Cleanout - \$300 OR \$240 with 20% discount

Depending on your ponds surroundings, a full cleanout may not be necessary. However, make sure you are prepared to keep the majority of debris, especially tree leaves out of your pond by protecting it with a net.

#### **Partial Cleanout Services**

- ✓ Cleanout skimmer and biofalls filters
- ✓ Cutback marginal aquatics and lilies
- ✓ Scoop out bulk of leaves that have fallen into pond
- ✓ Clean and/or remove pump(s)
- ✓ Install your floating de-icer (available for purchase)
- ✓ Install your aerator (available for purchase)
- ✓ Install your Pond Netting (available for purchase)
- ✓ Cold water bacteria (available for purchase)

## **Option 2: Full Cleanout Packages**

If your pond is in a dense area with lots of deciduous trees a full clean out may be necessary to avoid major build-up of debris over the autumn months. Once the weather starts to warm up in the spring, all of the debris accumulated in the bottom of your pond will start to decompose stressing your fish and ecosystem making it harder to get a good start for the spring.

<b>A) Baseline 100 sq.ft pond or less \$500 OR \$400 with 20% Discount</b>	<b>B) Small 200 sq.ft pond or less \$625 OR \$500 with 20% Discount</b>
